

Citadel

DUAL REBATE COMPOSITE
DOOR COLLECTION

Why choose a Composite Door?

Composite doors offer the look and feel of a traditional timber door with a huge range of additional benefits. These modern, low-maintenance alternatives to wooden or PVC doors will never rot, swell, crack, warp or need repainting. They also offer dramatically improved energy efficiency so you should notice a significant reduction in your heating bills.

More and more people are turning to composite doors to make their homes safer and more secure. Composite Doors provide a formidable barrier against would-be intruders, while offering a stylish welcome to guests. Our British-built composite doors are available in an extensive range of colours, styles and woodgrain effects with a wide variety of glazing options.

The Benefits of a Composite Door:

- Low maintenance
- Aesthetically pleasing
- Highly resistant to weathering
- Solid and robust - able to withstand any knocks and bumps
- More secure than a traditional timber door

What makes a Citadel Composite Door?

Not all composite doors are the same. You need to know that you're choosing one to last: one that offers the ultimate in security and energy efficiency.

The performance of each Citadel door is fully guaranteed for ten years, but every one has been designed to look good and perform flawlessly for much longer, giving you decades of low-maintenance service. Your front door is the first thing to greet any visitor and a well-selected door can not only improve the look of your home, increase its security and energy efficiency, it can also raise the value of your property.

We know the safety of your home is a primary concern. That's why, for your peace of mind all Citadel doors are fitted with a lock made by Yale.
